Revised 2015

## Business Code Worksheet

New work opportunities, emerging technologies, and changes in the way users conduct online searches have necessitated an update of the business codes in the NECA member profile. Contractors can now further distinguish their company by designating new types of work, construction methods, and certifications on their profiles. Contractors can also specify whether their service offering for each type of work covers a particular sector, i.e., commercial/industrial/institutional or residential or non-building or any combination of the three.

For each member profile, NECA has already mapped over the old business codes to the new codes. However, we highly encourage you to review and update this information since our **Find A Contractor** search is one of the primary ways in which new customers find NECA contractors matching their needs. Further enhancements to NECA Connection will be unveiled later this year.
